Upgrade version 2.1.4 of the S2 Software Suite has been released, and can be downloaded from:
http://lightorama.com/downloads/LORUpgrade-2.1.4.exe
This is only an upgrade.Â
 You must have a valid version of LOR I or LOR II software installed on your PC to install the software. **Also, make sure that you have completed the install of the LOR software by running the LOR Control Panel or LOR Sequence Editor at least once after you install your production copy of the software.**

Help Files.
 The installer will automatically install help files.Â However, they are also available for download individually, in case you want to see them before upgrading.Â They are available in both Microsoft Help File format, and PDF format:
Microsoft Help File Format: http://lightorama.com/downloads/LORHelp-2.1.4.chm
 PDF format: http://lightorama.com/downloads/LORHelp-2.1.4.pdf
Changes.
 First, please note that this version (2.1.4) is being released only a few days after the release of version 2.1.2.Â Version 2.1.2 contains many more changes than this release does, so if you haven't seen that yet, please check the release announcement for 2.1.2:

http://lightorama.mywowbb.com/forum72/18055.html
 Version 2.1.4 itself fixes the following three bugs (the first is a bug only in version 2.1.2; the other two were also bugs in earlier versions):
    -   In certain situations, adding a sequence to an MP3 Player Showlist would fail, with an error message saying "Path/File Access error".
    -   Sequences downloaded to an MP3 director would have their final lighting effect cut off prematurely.
    -   The Sequence Editor's New Musical Sequence Preferences dialog would not allow you to change the default timings to certain values ("MIDI Wizard", "Beat Wizard", and "VU Wizard") if you

opened the dialog via the "New Musical Sequence Preferences" menu item on the Preferences submenu of the Edit menu.
