

Upgrade version 2.1.6 of the S2 Software Suite has been released, and can be downloaded from:

<http://lightorama.com/downloads/LORUpgrade-2.1.6.exe>

### **This is only an upgrade.**

You must have a valid version of LOR I or LOR II software installed on your PC to install the software. **Also, make sure that you have completed the install of the LOR software by running the LOR Control Panel or LOR Sequence Editor at least once after you install your production copy of the software.**

### **Help Files.**

The installer will automatically install help files. However, they are also available for download individually, in case you want to see them before upgrading. They are available in both Microsoft Help File format, and PDF format:

**Microsoft Help File Format:** <http://lightorama.com/downloads/LORHelp-2.1.6.chm>

**PDF Format:** <http://lightorama.com/downloads/LORHelp-2.1.6.pdf>

### **Changes.**

First, please note that this version is being released soon after the releases of versions 2.1.2 and 2.1.4, and it includes all changes that were in those releases. So, if you have not yet already done so, please look at the changes listed in the release announcements for versions 2.1.2 and 2.1.4:

**Version 2.1.2:** <http://lightorama.mywowbb.com/forum72/18055.html>

**Version 2.1.4:** <http://lightorama.mywowbb.com/forum72/18146.html>

Version 2.1.6 itself fixes the following three bugs:

- If the waveform display were used with a completely silent audio file, the Sequence Editor would crash.
- If a sequence had a Windows shell command, and it were saved to a different filename than it had been loaded with, future changes to the Windows shell command in one of the two sequences would affect the Windows shell command in the other sequence as well.

- Shows scheduled by the Simple Show Builder, and run via the PC, would not necessarily end at their appropriate time.

The bug related to Windows shell commands was introduced in version 2.1.2, and present in 2.1.4; the other two bugs were also present in earlier versions of LOR 2.
