

You've spent a lot of time setting up your animations and sequences, now you want to back them up.

LOR's default installation directory is c:program fileslight-o-rama, and these directions assume that directory. If your installation of LOR is in another directory, you will need to make the associated changes.

There are 4 major components that need to be backed up.

- Sequence Files
- Audio Files
- Weekly Schedule
- Yearly Schedule

To backup the audio and sequence files, simply backup the files in the following directories:

- c:program fileslight-o-ramaaudio
- c:program fileslight-o-ramasequences

There are two more files in the c:program fileslight-o-rama directory that need to be backed up.

- WEEKSCHED.LSC: This file contains the schedule for a weekly basis. Example:
Monday-Thursday run this show. Friday-Sunday run that show.
- YEARSCHED.LSC: This file contains the entries where you pick a particular day, and run a certain show. For example, on the 24th, run "christmaseve.lss" show.
