

How do visitors hear the show music?

Last Updated Friday, 26 September 2008 21:07

I use a small, very low power, FM transmitter to let my guests hear the music that goes with the show. I use the Ramsey FM25B. You get it from [Ramsey's](#) site or check eBay. There are several sellers who I have heard very good things about. In fact, I bought mine off of eBay and have had no trouble with it. I bought mine from Big Ed.

[You can see his eBay store by clicking here.](#)
