

Dan Baldwin posted the following on the LOR Forums. For those of you wanting to know how you will upgrade to the full version of LOR 2. (Note: Right now LOR2 is a Gamma version.)

The full version of S2 (with license support) will be available for download from our website and store. The download will be free and it will be available to everyone.Â It will take a key to be activated (other than demo mode which cannot control lights).

Existing owners of the LOR software will get a free key. This key will unlock all features of the S2 software.Â

To get the key, people will go to the LOR store and purchase a (free) LOR1 to S2 upgrade. When you purchase this upgrade, the store will verify that you have purchased the LOR I software. If there is not a match you will be handled manually. In any case you will get a key.

The timeout on the 2.0.14 is the last day of June. We plan to have everything in place before that date.

Dan
