**How do I import the timing of my channels?**
Last Updated Sunday, 24 August 2008 08:51

The Light-O-Rama sequence editor does not have a way be default to export/import the timings within a sequence.

For most musical sequences, your timings are going to be based on the song, and exporting/importing wouldn't do you much good. However, there are those who will sequence a musical sequence with a standard timing, say .05 seconds. In this case you would want to click "Edit -> Preferences -> New Musical Preferences" and then edit the box that pops up.

As you can see here, we changed the "Some other value:" option to 0.05 seconds. Thus, any new musical sequence that you create would have the timing of .05.

Note: If you want to change this for animation sequences, then you will need to "Edit -> Preferences -> New Animation Preferences"
as well.
