2.0.14 - Gamma version of LOR2. This version stopped working in the summer of 2008. If you still have it installed, you will need to upgrade to 2.0.16.

LOR1

This is the original version of the software. It is very stable, and is still used by a number of people running their displays.

1.6.15

Released on 12/02/2007, this fixed a bug in 1.6.9. This is the last planned release of the LOR 1 series.

1.6.9

Released on 11/19/2007, this version fixed a bug in 1.6.3 where shows unexpectedly stopped playing.

1.6.3

As of 2007-05-30, version 1.6.3 has been released. This is a Windows VISTA release. Users of Windows XP will gain nothing by upgrading to 1.6.3.

1.6.1

This was the fix the for the 1.6.0 software, which was released in December 2006. It contained a new GUI interface and wave form viewer for the sequence editor. It also fixed a number of small bugs with the 1.5.0 software, as well as a few major bugs in the 1.6.0 software.

1.6.0

First, if you are using this version, PLEASE UPGRADE. Dan has mentioned there were a few bugs in the software, and users should upgrade. More about the new features of this version in 1.6.1.

1.5.0

Version 1.5.0 was the stable version of Light-O-Rama for the better part of 18 months, if not longer.
