

Versions Affected: 2.0.16

When placing a show in the calendar section of the LOR Scheduler, you may encounter a phantom show effect.

This bug centers around the display of the next show time, only. The start time of your actual show is not affected.

You will encounter this issue any time you use the calendar option to schedule a show. For example, you have a show scheduled to run on Tuesday the 23rd from 7:00p-10:00p. After the show, your status window will show "Waiting for next show. Next show Sunday, 12:00am." However, this is simply a display bug. Go to bed, get some rest. When you wake up the next morning, all will have returned to normal.

It's important to note this bug does not affect the operation of LOR in any way. It's simply a display bug in the status window.
